

Pop-a-Shot Setup

- Place pop-a-shot where you want it to be at the event.
- On the bottom left leg of the pop a shot, there is a button. Press that button and slowly lower the front part down till it is on the floor. Be careful that the net does not get tangled in the hoop.

- Grab an extension cord from a wire box and plug that into the power source and run the wire over to the pop-a-shot.
- Grab a 5V Power adaptor (this is important, if it is not a 5V, it will start smoking and will break. The power adaptor should be in the pop-a-shot accessories kit. Plug this into the back of the scoreboard.
- Make sure the balls are inflated if not, use the pump in the kit to inflate. Then place balls on pop-a-shot.
