Dance Floor Setup
(Matte Black or White)

1. Find the middle of the floor you will be setting up on. Use tape measurer if necessary

2. Center your first panel in the first row and then work out from there.

3. Line up the tongue and groove parts so it fits together nicely

4. Use the yellow hex wretch to lock each panel into place by turning it to your right.

5. One dance floor is complete, start to lock every corner piece in place

6. Spot clean any panels that need it.

7. Finished product should look like this
