

Glow Show Setup

- Take lighting pole out of bag and open up.
 - Make sure cross bars on legs are forming a 90 degree angle.

- Place small T bar on top of the lighting pole and tighten.

- Attach the C-Clamp that is inside the blacklight case, to the actual light itself.

- Attach the light using the C-Clamp to the cross bar on the lighting pole in a way that is making it so that light is being held right above the cross bar.

- Plug an IEC cable into the blacklight in order to power it up.
- Use the controller to test it to make sure it is working properly.
- Once working, coil the cable around the lighting tri-pod in order to clean up the wires.

- Take the spandex scrim out of the lighting pole bag and put it on the tripod.
- Raise the tripod up making the scrim tight. Cinch it in the middle like show in the photo
