# Pro Lightshow Setup

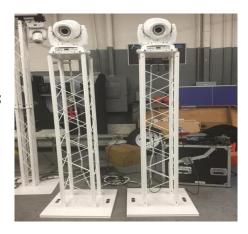

1. Connect the trussing and bases

2. Place trussing onto bases and secure with pins

3. Take moving headlights out of the case and place them on top of the trussing. 2 on either side of the DJ

4. Bolt-in with a screw to secure it to the top

5. Take white snake from the case and plug into the back of each light

6. Setup the laptop with show express dongle via a USB cord

7. Open ShowXpress on the desktop

8. Daisy chain lights starting from the dongle to the closest light, and so on

9. Tack any wires to the trussing using white tape to clean it up from the front.

The finished product should look similar to this:
